Office Action Summary	Application No. 10/663,436	Applicant(s) JOHNSON, RODNEY G.	
	Examiner Mark J. Beauchaine	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 11 February 2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the documents fail to comply with 37 CFR 1.52(e)(3)(i). Specifically, files on the compact discs are not in American Code for Information Interchange (ASCII).

They have been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing elements will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3653

Regarding claim 1, the term "moving cards" is language suitable to a method claim rather than to said apparatus claim. The term "capable of moving" would be acceptable language.

Regarding claim 31, said claim is redundant to preceding claim 30.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-19, 22-24, 32 and 33 are rejected under 35 U.S.C. 102(a) as being anticipated by Patent Number 5,989,122 by Roblejo. The card randomizing apparatus disclosed by Roblejo incorporates holder 12, stacking means 21 and reader 14 that read on the Applicant's holding area, collecting area and sensor, respectively. Furthermore, said apparatus of the '122 patent is able to "determine the identity of the playing cards [that] can be unmarked" (column 3, lines 18 plus) and "randomize the order of cards" (column 3, lines 34 plus).

Regarding claims 13-19, control means 11 of said '122 patent reads on the Applicant's microprocessor.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20, 21 and 25-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over said '122 patent as explained above, and further in view of Patent Number 5,431,399 by Kelley. Although the '122 patent fails to disclose a card data display the use of such displays to provide a user with card information is well known in the art. The '399 patent teaches a card shuffling apparatus that includes display 6 that reads on the Applicant's display. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the card data display of the '399 patent into the card randomizing apparatus disclosed by the '122 patent to provide the user with card-related information.

Conclusion

The following related art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 6,117,012 by McCrea, Jr. because of its shuffler 240,

Patent Number 5,584,483 by Sines et al because of its visual display 460, and

Art Unit: 3653

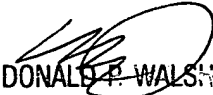

Patent Number 4,832,342 by Plevyak et al because of its feed wheel 11.
